SKILLS

Frontend

HTML CSS Javascript
Bootstrap Tailwind CSS Bulma
React JS Next JS Vue JS

Backend

Express JS Next JS Flask
Node JS PHP Python C++

Databases

SQL Mongo DB Firebase
Supabase Mongo DB Atlas

Generic

Layouts Prototyping MVC
OOP Problem Solving
Formal Writing

Content Management

WordPress Contentful Sanity

I'm skilled in all aspects of web development, from layout and prototyping to design and structure, development and building, management and maintenance, repair and construction. To be precise I am a Web Engineer with more than 2 years of experience in the field of the web development.

PLACEMENTS

Federal Govt.

(July 30, 2020 - Present)

IT Assistant

- Data management of procurement records, insights generation, and retrieval of documents on request.
- Optimize website and software on users' issues and queries.
- Analyze and propose technical solutions based on users' needs and requirements.
- Provide guidance and training to users,
- Administrate, support, and monitor databases by proactively resolving database and server issues.

Famespark

(July 30, 2019 - July 30, 2020)

Ghost Designer

- Designed user interfaces that aligned with client specifications and briefs, ensuring visually captivating and user-friendly websites.
- Crafted website content by combining copywriting skills with image designing, resulting in engaging and compelling online experiences.
- Collaborated closely with UX and product teams to define visually appealing yet functional requirements, incorporating user-centered design principles.
- Conducted live user testing of components and functionality to evaluate the effectiveness of designs and identify areas for improvements.
- Utilized wireframes, mock-ups, and prototypes to establish a solid foundation for user interface design and architecture.

Famespark

(July 30, 2018 - May 30, 2019)

Jr. Developer

- Developed new user-facing features using React.js, enhancing the functionality and user experience of web applications.
- Built reusable components and front-end libraries, ensuring efficient development and easy maintenance of code for future projects.
- Translated designs and wire-frames into high-quality code, bringing visual concepts to life with attention to detail and adherence to coding best practices.
- Optimized components for maximum performance across a wide range of web-capable devices and browsers, ensuring smooth and seamless user interactions.
- Contributed to the company's custom-made component library, fostering code re-usability and accelerating development processes.

COURSES

Introduction to AI Deep Learning AI	(April 30, 2019)
Image Processing and OCR University of Michigan	(August 30, 2019)
Python Programming University of Michigan	(March 29, 2016)
Web Structuring University of Michigan	(April 16, 2016)
Data Structures in Python University of Michigan	(April 03, 2016)

PREFERENCES

Content Creator

- The Net Ninja
- Web Dev Simplified
- Traversy Media
- Dave Gray

Video Games

- Counter-Strike: Global Offensive
- Valorant

Movie & Series

- The Imitation Game
- Money Heist

AI Tools

- Bard
- Chat GPT

Indoor Game

- Chess
- Ludo

Pets

- Cat
- Dog

Intermediate

QUALIFICATION

Ilma University	(October 30, 2016 - December 30, 2020)
BS Software Engineering, Software Engineering	

What a thrill! my **paper crane** production line had to be **shut down**, so I could finally discover my true passion i.e. **coding** and chasing **bugs & errors** all day long. I'm so excited to spend the rest of my life in this **stimulating** and **fulfilling** career.

PROJECTS

Analyticsmart

It is a data analytics company that provides smart analytical services and solutions to businesses of all sizes.

<https://analyticsmart.com/>

- wordpress
- php
- sql
- google analytics

JomRun

It is a Southeast Asia-based running app that helps users find and register for running events.

<https://www.jomrun.com/>

- html
- css
- javascript
- php
- mysql

Covid-19 Visualizer

Web GIS project showcasing an interactive 3D visualization of Covid-19

<https://track-covid-19.vercel.app/>

- javascript
- snow pack
- three js
- covid 19
- world o meter

Wildfire Tracker

A basic implementation of Web GIS. This project is using the data that is coming from NASA's EONET API and plots it on Google Maps.
